SUMMARY

Computer Science graduate with experience in software testing, system analysis, and project coordination. Good at making system workflows, testing software manually, and writing clear user guides. A responsible team leader with strong time management skills to finish projects on time.

EXPERIENCE & PROJECTS

Brain Stroke Classification System - Undergraduate Thesis

- Created a multimodal AI model that combines medical images and patient clinical data to classify brain stroke types.
- Developed the screening application based on the real workflows and requirements of medical professionals.
- Designed the system diagrams to ensure the application is easy to use for medical staff.

Teaching & Administrative Intern - SMP Negeri 3 Bogor

- Structured and organized instructional materials to support efficient information delivery and learning flows.
- Assisted in daily clerical tasks, including data entry and maintaining accurate departmental records.
- Handled and filed administrative documents with high attention to detail to support school operations.

SKILLS

- Project & Product Management:** Project Planning, Task Allocation, Team Leadership, Sprint Coordination, Time Management.
- Systems Analysis & Design:** System Workflow Design, Functional Requirements Mapping, Logic Diagrams & Flowcharts.
- Software Quality Assurance:** Manual Software Testing, Test Case Creation, Bug Documentation & Reporting, Attention to Detail.
- Technical Writing:** Product Documentation, Step-by-Step User Guides, Cross-functional Communication.
- Tools & Platforms:** ClickUp Workspace, Draw.io, Figma, Google Workspace, MS Office.

EDUCATION

Universitas Pakuan

Bachelor of Computer Science | GPA: 3.78/4.00

- 2022 - 2026

CERTIFICATION
