SUMMARY

Computer Science graduate with experience in software testing, system analysis, and project coordination. Skilled in designing system workflows, executing manual and automated testing. A responsible team leader with strong time management to finish projects on time.

EDUCATION

Universitas Pakuan | 2022 - 2026

Bachelor of Computer Science | GPA: 3.79/4.00

EXPERIENCE & PROJECTS

Brain Stroke Classification System | Undergraduate Thesis

- Created a multimodal AI model that combines medical images and patient clinical data to classify brain stroke types.
- Developed the screening application based on the real workflows and requirements of medical professionals.
- Designed the system diagrams to ensure the application is easy to use for medical staff

Teaching Intern | SMP Negeri 3 Bogor

- Served as a teaching intern while analyzing requirements to design a gamified application, mapping out user-friendly process flows and system logic to align with operational objectives.
- Monitored the application's live deployment and analyzed user feedback to identify system friction, troubleshoot operational issues, and provide structured optimization solutions.
- Managed daily administrative records and structured instructional data to maintain full compliance with institutional procedures and school operational timelines.

ORGANIZATIONAL EXPERIENCE

Project Secretary | BEM FMIPA Universitas Pakuan Event

- Held full responsibility for compiling, validating, and structuring the final project accountability report (LPJ), ensuring total alignment with organizational governance and financial records.
- Managed comprehensive project documentation and official correspondence to maintain strict procedural compliance and support smooth operational flows.

SKILLS & TOOLS

- **Project & Product Management:** Project Planning, Task Allocation, Team Leadership, Sprint Coordination, Time Management.
- **Systems Analysis & Design:** System Workflow Design, Functional Requirements Mapping, Logic Diagrams & Flowcharts.
- **Software Quality Assurance:** Manual Software Testing, Automation Testing, Test Case Creation, Bug Documentation & Reporting, Attention to Detail.
- **Technical Skills & Platforms:** Python, JavaScript, Cypress, ClickUp, Jira, Draw.io, Figma, Google Workspace, MS Office.
